Subject Index of Volume 37

Acrylonitrile
/methyl acrylate copolymer, electrical conduction and dipole orientation of, 335
Activation parameters
estimation of distribution of, of thermally stimulated processes (abstract), 355
Ammonia gas
determination of field-effect mobility of poly(3-hexylthiophene) upon exposure to, 123
Azobenzene molecules
electronic spectra and *trans–cis* photoisomerization of, in oriented polyethylene matrix (abstract), 266

Barrier model
for fluctuation-induced tunnelling in highly conductive polyacetylene, novel, 23

Carbon
preparation of thin hydrogenated C and Si–C layers, 341
Charge-carrier photogeneration
in polymers (abstract), 352
Charge transfer
in photoconductors (abstract), 353
Charge transport
manifestation of glass transition in electronic, in Si and Ge backbone polymers, 295
Poole–Frenkel behavior of, in organic solids with off-diagonal disorder studied by Monte Carlo simulation, 271
Conductivity
of doped polyacetylenes and their morphology, 7
in polymeric organic metals, some new model structures designed so as to understand origin of, 79
Conformation structures
and physical properties of electroactive polymers (abstract), 131
Conjugation length
dependence of, on polymerization depth, 35
Continuum model
double sine-Gordon equation from, of polydiacetylene, 313
Copolymer
acrylonitrile/methyl acrylate, electrical conduction and dipole orientation of, 335
Copper tetra-4-t-butylphthalocyanine
Langmuir–Blodgett films; photoelectrical and structural studies, 327
Cubic susceptibility
frequency variation of, in new conjugated polymers PTT and PDTB, 223

d.c. conductivity
mechanisms limiting, of high-conductivity polyacetylene, 1
and thermopower of $FeCl_3$-doped poly(*p*-phenylene), 107
Diacetylene
electrical properties of polymerizing single crystalline pTS, 305
Dielectric and electric relaxation
in amorphous ionenes (abstract), 349
1,8-Dihydrobenzodipyrrole
regiochemistry of oxidative polymerization of (abstract), 133
Dipole orientation
electrical conduction and, of acrylonitrile/methyl acrylate copolymer, 335
Doping
with heteropolyanions, modification of polyacetylene and polyalkylthiophene by, 99
Double sine-Gordon equation
from continuum model of polydiacetylene, 313

Electrical conduction
and dipole orientation of acrylonitrile/methyl acrylate copolymer, 335
Electrical properties
of anisotropic polyolefin–CT complex composites, 175
of new form of soluble polyacetylene, 255
of polycyanoacetylene, pyrolysis and, 13

Elsevier Sequoia/Printed in The Netherlands

of polymerizing single-crystalline pTS diacetylene, 305
Electroactive polymers
conformational structures and physical properties of (abstract), 131
Electrochemical oxidation
and reduction on polypyrrole electrodes, 115
Electrochemical properties
of polyaniline in highly concentrated acids, 63
of poly(dihydroxyindole), synthetic analog of melanin (abstract), 350
Electrochemical synthesis
and properties of poly(dihydroxyindole), synthetic analog of melanin (abstract), 350
Electrodes
polypyrrole, electrochemical oxidation and reduction on, 115
Electron microscopy
and X-ray diffraction studies of polyaniline films, 69
Electronic spectra
and *trans–cis* photoisomerization of azobenzene molecules in oriented polyethylene matrix (abstract), 266
Electronic states
in polyaniline, phenyl ring rotations, structural order and, 45
Electronic structure
of conducting organic crystals and polymers, infrared studies of (abstract), 132
of polyacetylene from optical absorption spectra, analysis of (abstract), 33
Electro-optic behaviour
of polymer-dispersed liquid crystal films (abstract), 265
Ellipsometric measurements
of polyaniline and its soluble methoxy-substituted derivatives *in situ* (abstract), 73
EPR study
electrochemical *in situ*, of insulator-to-metal transition in polyaniline (abstract), 74
Excimers
time-resolved studies of, in crystalline isotactic polystyrene (abstract), 267

Field-effect mobility
determination of, of poly(3-hexylthiophene) upon exposure to NH_3 gas, 123
Fluctuation-induced tunnelling
novel barrier model for, in highly conductive polyacetylene, 23
Frequency variation
of cubic susceptibility in new conjugated polymers PTT and PDTB, 223

Germanium
manifestation of glass transition in electronic charge transport in Si and Ge backbone polymers, 295
Glass transition
in electronic charge transport in Si and Ge backbone polymers, manifestation of, 295

Heteropolyanions
modification of polyacetylene and polyalkylthiophene by doping with, 99
Hole-burning spectroscopy
amorphous silica doped with organic impurities as optically active material for low-temperature, 264

Infrared studies
of electronic structure of conducting organic crystals and polymers (abstract), 132
Insulating layers
non-isothermal dispersive transient currents in non-homogeneous (abstract), 358
Insulator-to-metal transition
in polyaniline, electrochemical *in situ* EPR study of (abstract), 74
Ionenes
dielectric and electric relaxation in amorphous (abstract), 349
Iron
d.c. conductivity and thermopower of $FeCl_3$-doped poly(*p*-phenylene), 107
Isotropic reticulate doped polymers
temperature and frequency dependences of microwave conductivity of, 165

Langmuir–Blodgett films
Cu tetra-4-t-butylphthalocyanine; photoelectrical and structural studies, 327
Laser-induced generation
of highly conducting areas in poly(bisalkylthioacetylenes), 151

Liquid crystal films
electro-optic behaviour of polymer-dispersed, 265

Magnetic resonance studies
of alkali-doped polyacetylene (abstract), 41
Melanin
electrochemical synthesis and properties of poly(dihydroxyindole), synthetic analog of (abstract), 350
Methyl acrylate
acrylonitrile/, copolymer, electrical conduction and dipole orientation of, 335
Microwave conductivity
temperature and frequency dependences of, of isotropic reticulate doped polymers, 165
Monte Carlo simulation
Poole–Frenkel behavior of charge transport in organic solids with off-diagonal disorder studied by, 271
Morphology
conductivity of doped polyacetylenes and their, 7
Multiphoton nonlinear interactions
in conjugated organic polymers, 231

Optical absorption spectra
analysis of electronic structure of polyacetylene from (abstract), 33
Optical properties
of anisotropic polyolefin–CT complex composites, 175
of new form of soluble polyacetylene, electrical, photoelectrical and nonlinear, 255
Optical third-harmonic generation
in substituted poly(phenylacetylenes) and poly(3-decylthiophenes), 249
Optically active material
amorphous silica doped with organic impurities as, for low-temperature hole-burning spectroscopy (abstract, 264
Optically nonlinear polymers
and devices, developments of, 207
Organic crystals
infrared studies of electronic structure of conducting, and polymers (abstract), 132
Organic polymers
multiphoton nonlinear interactions in conjugated, 231
Organic solids
with off-diagonal disorder, Poole–Frenkel behavior of charge transport in, studied by Monte Carlo simulation, 271
Oxidative polymerization
regiochemistry of, of 1,8-dihydrobenzodipyrrole (abstract), 133

PDTB
frequency variation of cubic susceptibility in new conjugated polymers PTT and, 223
Phenyl ring rotations
structural order and electronic states in polyaniline, 45
Photoconductivity
action spectra in single crystals of polydiacetylenes, 321
of polyparacyclophane·TCNE CT complex (abstract), 354
Photoconductors
charge transfer in (abstract), 353
Photoelectrical properties
of new form of soluble polyacetylene, 255
Photoelectrical studies
Cu tetra-4-t-butylphthalocyanine Langmuir–Blodgett films; and structural, 327
Photogeneration
in polymers, charge-carrier (abstract), 352
Photoisomerization
electronic spectra and *trans–cis*, of azobenzene molecules in oriented polyethylene matrix (abstract), 266
Physical properties
of electroactive polymers, conformational structures and (abstract), 131
Piezoelectric polymers
structure and polarization in, 283
Polarization
in piezoelectric polymers, structure and, 283
Polyacetylene(s)
analysis of electronic structure of, from optical absorption spectra (abstract), 33
conductivity of doped, and their morphology, 7
electrical, photoelectrical and nonlinear optical properties of new form of soluble, 255
magnetic resonance studies of alkali-doped (abstract), 41

mechanisms limiting d.c. conductivity of high-conductivity, 1
modification of, and polyalkylthiophene by doping with heteropolyanions, 99
novel barrier model for fluctuation-induced tunnelling in highly conductive, 23
Polyalkylthiophene
modification of polyacetylene and, by doping with heteropolyanions, 99
Poly(3-alkylthiophenes)
synthesis and characterization of conducting polymer blends of, 145
thermochromism in, and their polymer blends, 195
Polyaniline
electrochemical *in situ* EPR study of insulator-to-metal transition in (abstract), 74
electrochemical properties of, in highly concentrated acids, 63
in situ ellipsometric measurements of, and its soluble methoxy-substituted derivatives (abstract), 73
phenyl ring rotations, structural order and electronic states in, 45
resonance Raman scattering of spin-carrying states in, 57
Polyaniline films
electron microscopy and X-ray diffraction studies of, 69
Polyaniline solutions
viscosimetric investigation of (abstract), 75
Poly(bis-alkylthioacetylenes)
laser-induced generation of highly conducting areas in, 151
Polycyanoacetylene
pyrolysis and electrical properties of, 13
Poly(3-decylthiophenes)
optical third-harmonic generation in substituted poly(phenylacetylenes) and, 231
Polydiacetylene(s)
double sine-Gordon equation from continuum model of, 313
photoconductivity action spectra in single crystals of, 321
Poly(dihydroxyindole)
electrochemical synthesis and properties of, synthetic analog of melanin, 350
Poly(dithieno(3,4-*b*:3′,4′-*d*)thiophene)
characterization of conducting (abstract), 134
Polyethylene matrix
electronic spectra and *trans–cis* photoisomerization of azobenzene molecules in oriented (abstract), 266
Poly(3-hexylthiophene)
determination of field-effect mobility of, upon exposure to NH_3 gas, 123
Polymer(s)
with aromatic rings, Raman spectra of conducting, 91
charge-carrier photogeneration in (abstract), 352
conjugated organic, multiphoton nonlinear interactions in, 231
-dispersed liquid crystal films, electro-optic behaviour of, 265
frequency variation of cubic susceptibility in new conjugated, PTT and PDTB, 223
infrared studies of electronic structure of conducting organic crystals and (abstract), 132
optically nonlinear, and devices, developments of, 207
photoconductive, TCS drift measurements of (abstract), 356
piezoelectric, structure and polarization in, 283
reticulate doped, temperature and frequency dependences of microwave conductivity of isotropic, 165
Si and Ge backbone, manifestation of glass transition in electronic charge transport in, 295
spectral hole burning in doped; fundamentals and applications (abstract), 263
Polymer blends
of poly(3-alkylthiophenes), synthesis and characterization of conducting, 145
thermochromism in poly(3-alkylthiophenes) and their, 195
Polymer films
highly conductive form of $S^+Et_2Me(TCNQ)_2$ complex in reticulate doped, 189
Polymeric organic metals
conductivity in, some new model structures designed so as to understand origin of, 79

Polymerization
regiochemistry of oxidative, of 1,8-dihydrobenzodipyrrole (abstract), 133
Polymerization depth
dependence of conjugation length on, 35
Polyolefin–CT complex composites
optical and electrical properties of, 175
Polyparacyclophane
·TCNE CT complex, photoconductivity of (abstract), 354
Poly(phenylacetylenes)
optical third-harmonic generation in substituted, and poly(3-decylthiophenes), 249
Poly(*p*-phenylene)
d.c. conductivity and thermopower of $FeCl_3$-doped, 107
Polypyrrole colloids
non-aqueous; synthesis and characterization, 137
Polypyrrole electrodes
electrochemical oxidation and reduction on, 115
Polystyrene
time-resolved studies of excimers in crystalline isotactic, 267
Poly(vinylidene fluoride)
conductive, reticulate doped with CT complex TTF-TCNQ, 181
Poole–Frenkel behavior
of charge transport in organic solids with off-diagonal disorder studied by Monte Carlo simulation, 271
PTT
frequency variation of cubic susceptibility in new conjugated polymers, and PDTB, 223
Pyrolysis
and electrical properties of polycyanoacetylene, 13

Raman spectra
of conducting polymers with aromatic rings, 91
Regiochemistry
of oxidative polymerization of 1,8-dihydrobenzodipyrrole (abstract), 133
Resonance Raman scattering
of spin-carrying states in polyaniline, 57
Reticulate doped polymer films
highly conductive form of $S^+Et_2Me(TCNQ)_2$ complex in, 189

$S^+Et_2Me(TCNQ)_2$ complex
highly conductive form of, in reticulate doped polymer films, 189
Silica
amorphous, doped with organic impurities as optically active material for low-temperature hole-burning spectroscopy (abstract), 264
Silicon
manifestation of glass transition in electronic charge transport in Si and Ge backbone polymers, 295
preparation of thin hydrogenated C and Si–C layers, 341
Spectral hole burning
in doped polymers; fundamentals and applications (abstract), 263
Spectroscopy
low-temperature hole-burning, amorphous silica doped with organic impurities as optically active material for, 264
Structural order
phenyl ring rotations, and electronic states in polyaniline, 45
Structural studies
Cu tetra-4-t-butylphthalocyanine Langmuir–Blodgett films; photoelectrical and, 327
Structure
and polarization in piezoelectric polymers, 283
Synthesis and characterization
of conducting polymer blends of poly(3-alkylthiophenes), 145
non-aqueous polypyrrole colloids, 137

TCNE
polyparacyclophane·, CT complex, photoconductivity of (abstract), 354
Thermally stimulated conductivity
approximate analytical formulae for, and thermoluminescence (abstract), 360
Thermally stimulated processes
estimation of distributions of activation parameters of (abstract), 355
Thermally stimulated time-of-flight experiments (abstract), 357
Thermochromism
in poly(3-alkylthiophenes) and their polymer blends, 195
Thermoluminescence
approximate analytical formulae for thermally stimulated conductivity and (abstract), 360

Thermopower
d.c. conductivity and, of $FeCl_3$-doped poly(*p*-phenylene), 107
Time-of-flight experiments
thermally stimulated (abstract), 357
Time-resolved studies
of excimers in crystalline isotactic polystyrene (abstract), 267
Transient currents
non-isothermal dispersive, in non-homogeneous insulating layers (abstract), 358
TSC drift measurements
of photoconductive polymers (abstract), 356
TTF-TCNQ
conductive poly(vinylidene fluoride) reticulate doped with CT complex, 181

Viscosimetric investigation
of polyaniline solutions (abstract), 75

X-ray diffraction studies
of polyaniline films, electron microscopy and, 69
